

# Alive2 Work

Raja

Department of Computer Science  
Iowa State University

August 20, 2024

- A Translation validation tool for LLVM IR.
- checks for *refinements* in the given IR.

<sup>1</sup>[llvm.org/devmtg/2019-10/slides/Lopes-Regehr-Alive2.pdf](http://llvm.org/devmtg/2019-10/slides/Lopes-Regehr-Alive2.pdf)

## Translation Validation tool (alive-tv)

① `alive-tv < source > < target >`

validates the optimizations in the *target* with the *source*.

② `alive-tv < source >`

performs optimization on the *source* with clang opt tool and then validates those optimizations.
